EXPERIENCE

Full Stack Developer, Government & Private Sector Systems 2+ Years

- Built production systems for government offices and businesses, including regional and national DepEd platforms, a resort management system, and an HR leave monitoring solution.
- Delivered end-to-end web applications featuring secure authentication, role management, workflow automation, and reporting systems.
- Received the "Full Stack Developer Award" for contributions to a regional government system launch.

Local Government Unit (LGU) Pasacao, Pasacao, Philippines

IT Support Intern (Work Immersion)

- Troubleshoot and resolved various hardware and software issues to maintain system stability.
- Assisted the core IT team with network configurations to support local infrastructure.

PROJECTS

IRIMS-V (Flagship Project) | *Laravel, PostgreSQL, Tailwind CSS*

- Developed a Learning Resource Information Management System for inventory, monitoring, dashboards, and reporting across education offices.

LRMIS | *Laravel, Tailwind CSS, Google Sheets API*

- Engineered a full-stack national web application for managing learning resources across educational institutions in the Philippines.

EDULEAVE | *Laravel, PHP, MySQL, REST API*

- Built a division-level HR platform to automate leave credit monitoring for teaching and non-teaching personnel, replacing manual records with a clearer digital workflow.

Eurasian | *PHP, MySQL, ApexCharts*

- Created an end-to-end resort operations platform to streamline reservations, booking workflows, guest records, and management visibility.

IRIMS-V Library | *Vue, Inertia.js, Laravel, Chart.js*

- Designed a smart library management platform to organize resources, monitor inventory, and streamline borrowing records using QR code support.
